

It's All Music

AN EDUCATIONAL GUIDE TO A HEALTHY,
BALANCED, ORGANIC MUSICAL DIET

How BEYONCE is the same as BEETHOVEN (and similar tales of musical connections)

By jumping inside the music, pianist, composer and educator Simon Lasky, demonstrates how musical devices which excite and engage young people in rock, pop and electronic music are also present many great classical works.

Using cleverly conceived audio & video extracts and live musical examples performed by Simon at the piano, students will be shown how these devices cause them a physical and emotional reaction and will be encouraged to enjoy a more varied, wholesome musical diet.

Musical processes in Bach and The Beatles work in the same way. In this engaging multi-media lecture/presentation Simon makes profound connections between music that was, in some cases, written 250 years apart – if it can enrich our lives, it doesn't matter whether it was written in 1735 or 2005, *It's All Music*.

**A 60 minute lecture/presentation
for 14-18 year olds**
